Frontend :	HTML, CSS, React, Tailwind CSS
Backend :	Express.js, Node.js, REST APIs
Databases :	MongoDB
Tools :	Git, GitHub

PROJECTS

Wanderlust
Individual Project

- Developed a full-stack **travel accommodation booking platform** using MongoDB, Express.js, Node.js, and EJS.
- Implemented user authentication, property listing management, and review functionality.
- Integrated Cloudinary for image uploads and Mapbox for location-based features.
- Designed responsive user interfaces and **RESTful backend APIs**.
